SUMMARY

Backend engineer with 6 years of Node.js and PostgreSQL experience, focused on payment systems and high-load APIs. Targeting a Senior Backend Engineer role.

EXPERIENCE

Backend Engineer, *PayFlow* 2021 – present

- Built the payment authorisation service in NestJS and PostgreSQL
- Cut p95 latency of the checkout API from 800 ms to 250 ms by moving reads to a replica
- Mentored two junior engineers
- Designed an idempotent webhook ingestion pipeline handling 2M events per day
- Introduced contract tests between 6 services, removing a class of release regressions
- Led the migration from callbacks to async/await across a 120k-line codebase
- Ran weekly incident reviews and owned the on-call runbook

Freelance Node.js developer

- Delivered REST APIs for small e-commerce clients

Junior Developer, *SoftServe* 2018 – 2020

- Maintained internal reporting tools in Express

Software Engineer, *Grammarly* 2017 – 2018

- Designed an idempotent webhook ingestion pipeline handling 4M events per day
- Introduced contract tests between 12 services, removing a class of release regressions

Full-stack Developer, *EPAM Systems* 2016 – 2017

- Designed an idempotent webhook ingestion pipeline handling 6M events per day
- Introduced contract tests between 18 services, removing a class of release regressions
- Led the migration from callbacks to async/await across a 360k-line codebase

Backend Developer, *Ajax Systems* 2015 – 2016

- Designed an idempotent webhook ingestion pipeline handling 8M events per day
- Introduced contract tests between 24 services, removing a class of release regressions
- Led the migration from callbacks to async/await across a 480k-line codebase
- Ran weekly incident reviews and owned the on-call runbook

Intern, *Lohika* 2014 – 2015

- Designed an idempotent webhook ingestion pipeline handling 10M events per day
- Introduced contract tests between 30 services, removing a class of release regressions

Technical Support Engineer, *Kyivstar* 2013 – 2014

- Designed an idempotent webhook ingestion pipeline handling 12M events per day
- Introduced contract tests between 36 services, removing a class of release regressions
- Led the migration from callbacks to async/await across a 720k-line codebase

EDUCATION

BSc Computer Science, *Lviv Polytechnic*

MSc Software Engineering, thesis on distributed consensus in partially synchronous networks, *Ukrainian Catholic University* 2020 – 2022

SKILLS

Node.js · TypeScript · NestJS · PostgreSQL · Redis · Docker · AWS · Kafka · GraphQL · gRPC · Terraform · Kubernetes · RabbitMQ · Prometheus · Grafana · OpenTelemetry · Jest · Vitest · Playwright · Elasticsearch
